PROFESSIONAL SUMMARY

Results-driven Software Engineering student at Sesame University with hands-on experience in **Full Stack Development, DevOps, and AI/ML**. Delivered production-grade web applications using Spring Boot and Angular, automated CI/CD pipelines with Docker and GitHub Actions, and engineered machine learning systems for anomaly detection and signal classification.

TECHNICAL SKILLS

Languages	Python, Java, SQL, Bash
Backend & APIs	Spring Boot, Django, REST APIs, GraphQL
Frontend	Angular, HTML/CSS
AI / ML	Scikit-learn, LazyClassifier, NumPy, Isolation Forest, Anomaly Detection
Generative AI & LLMs	Prompt Engineering, LLM Integration, AI-Assisted Development (Claude, ChatGPT, Copilot, Codex)
Databases	MySQL, PostgreSQL
DevOps & Cloud	Docker, GitHub Actions, CI/CD, AWS (EC2, S3, IAM, RDS, Lambda)
Tools & Systems	Git, GitHub, Linux (Ubuntu, Kali Linux)
Methodologies	Agile, Scrum, Microservices

EXPERIENCE

Cybersecurity & Penetration Testing Intern

Jul 2025 – Aug 2025

El Kanaouet – Tunis, Tunisia

- Conducted end-to-end penetration testing and vulnerability assessments on production web applications using OWASP methodologies, identifying and documenting critical security flaws.
- Delivered structured remediation reports to the development team, directly contributing to patching of high-severity vulnerabilities and strengthening overall application security posture.

Software Engineering Intern – CERT Case Management System

Feb 2024 – Jun 2024

National Frequency Agency (ANF) – Tunis, Tunisia

- Architected and shipped a full-stack intranet web application to digitize CERT incident tracking workflows, replacing manual processes for 20+ agency staff using Spring Boot, Angular, and MySQL.
- Designed a normalized relational database schema and secured RESTful API layer with Spring Boot; maintained clean branching and code review workflows via Git and GitHub.

IT Systems Intern

Jul 2023 – Aug 2023

Tac-Tic Company – Tunisia

- Deployed and configured the NVR Feniks IP camera surveillance platform on Ubuntu Linux, validating end-to-end video stream capture, storage, and network stability across the infrastructure.

PROJECTS

EEG Signal Classification – Machine Learning Pipeline *Python, NumPy, Pandas, Scikit-learn*

- Engineered an end-to-end ML pipeline for EEG brain signal classification, encompassing multi-channel data preprocessing, noise filtering, and discriminative feature extraction from neurological datasets.
- Trained and benchmarked multiple Scikit-learn classifiers, selecting the optimal model based on accuracy, precision, recall, and F1-score; systematically compared results across evaluation metrics to validate generalization.

AI Security Agent for Django Applications *Python, Django, Scikit-learn, Isolation Forest, Pandas*

- Built a real-time AI-powered intrusion detection system that monitors Django server request logs and flags anomalous behavior using an Isolation Forest model trained on baseline traffic patterns.
- Layered ML-driven anomaly scoring with rule-based brute-force detection heuristics, enabling multi-vector threat identification with automated alerting and zero manual log review.

DevOps CI/CD Pipeline with Java Microservices *Java, Spring Boot, Docker, GitHub Actions*

- Designed and implemented a fully automated CI/CD pipeline using GitHub Actions to build, test, and containerize Spring Boot microservices, reducing deployment to a zero-touch process.
- Optimized multi-stage Docker builds to minimize image size and enforce environment parity across development and staging, improving release reliability.

Automated Web Scraping & ETL Data Platform *Python, Django, Angular, MySQL, REST APIs*

- Built a full-stack ETL platform with a Django REST backend and Angular frontend to automate scheduled web data extraction, transformation, and storage into MySQL with deduplication logic.
- Exported structured datasets to CSV for downstream analytics, enabling end-to-end data pipeline from source ingestion to reporting-ready output.

Tennis Club Management System *Python, Django, MySQL, REST APIs, GraphQL*

- Collaborated in an Agile team to deliver a full-stack club operations platform covering member registration, court scheduling, and tournament management via Django REST and GraphQL APIs.

EDUCATION

Engineering Degree in Software Engineering

Sesame University – Tunis, Tunisia

Oct 2024 – Jun 2027 (Expected)

Bachelor's Degree in Computer Science & Multimedia

Sesame University – Tunis, Tunisia

Sep 2021 – Aug 2024

CERTIFICATIONS

Scrum Foundation Professional Certificate

CERTIPROF

Python Programming Essentials

Coursera

Full Stack Web Development with Python

Udemy

EF SET English Certificate – C1 Advanced

EF Education First

LANGUAGES

Arabic – Native • English – C1 Advanced • French – Professional Proficiency
